

The Dash Panel Connection Kit is designed to allow the dash panel gauges to be unplugged for easy removal and servicing. The dash gauge connection kit plugs together to form the complete Dash Panel connection system. The complete kit is shown on the reverse side of this part number 500041 sheet. This shows you how Part # 500032 fits into the complete Dash Panel connection system. The design of this gauge extension kit allows you to wire a gauge such as a speedometer with an instrument panel light. Additionally, this kit passes the 12 volt power lead through the connectors to allow additional gauge power.

Specific instructions concerning connection of this kit are as follows:

1. The Dk.Green wire in Connector #1 is connected to your Water Temp Gauge.
2. The Dk.Blue wire in Connector #1 is connected to your Oil Pressure Gauge.
3. The Tan wire in Connector #1 is connected to your Gas Gauge.
4. The Dk.Blue wire in Connector #2 is connected to your Right Turn Dash Indicator.
5. The Lt.Blue wire in Connector #2 is connected to your Left Turn Dash Indicator.
6. The Lt.Green wire in Connector #2 is connected to your Dash High Beam Indicator.
7. Connector #3 is plugged into the Gauge Feed Jumpers supplied. The kit comes with three. You may add as may as needed.
