

In this kit you will find the following:

1. 2 rubber grommets.
2. Misc. connectors, terminals, and ground wires to complete engine, alternator, and forward lamp connections.

The two grommets will be used to line the stock engine and forward lamp harness connection holes at the firewall prior to routing the new harness out into the engine compartment. The terminals, connectors, and ground wire assemblies will be used to complete the various connections under the hood of the car. Those detailed instructions can be found on pages 9 and 10 of the main instruction set.
